Mobile Internet in Switzerland	
Note	<p>The transmission speeds listed represent optimal performance and are not guaranteed. Actual Internet speed depends on factors such as topography, network coverage, distance to the transmission tower, signal strength inside/outside buildings, or other factors and may be slower than the specified maximum Internet speed.</p> <p>Excessive use of mobile network services can impair network performance which has a direct effect on other mobile network customer's user experience. In order to prevent this situation, Sunrise will temporarily deprioritize data traffic of customers who reach a certain limit value. This generally only becomes noticeable when carrying out more data-intensive activities and only on antenna cells that are temporarily overloaded. More information you will find on our website.</p>
