

Business Connectivity.

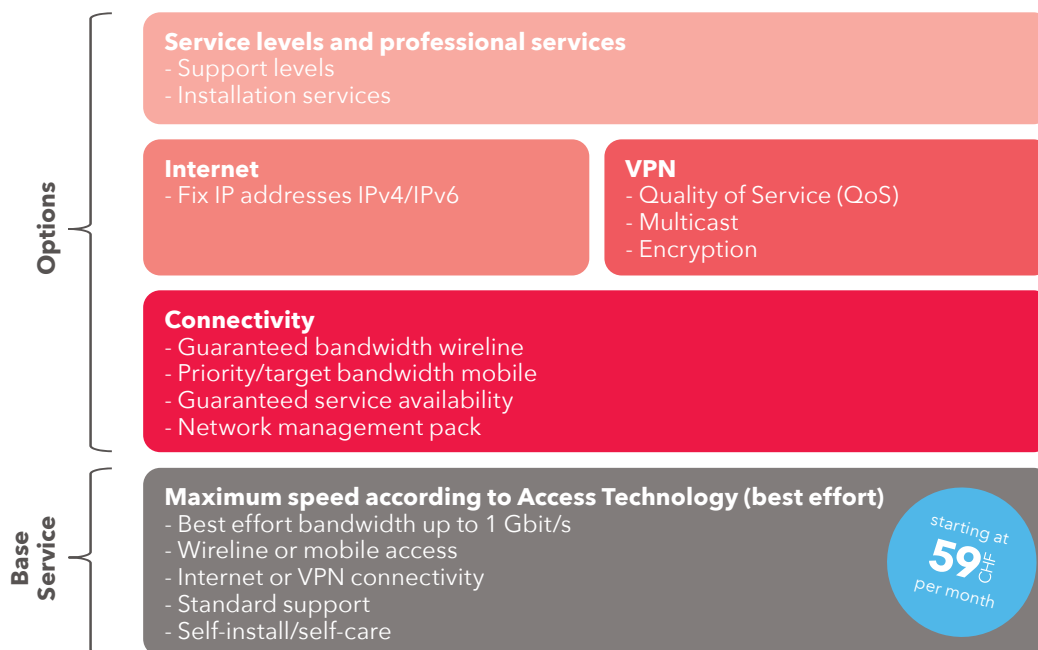

Internet and WAN for your business. Simple. Digital.

Would you like to connect your company location to the Internet, or your other company locations to each other, as quickly and easily as possible via a VPN (virtual private network)? Nothing could be easier! The new Business Connectivity from Sunrise provides a one-stop solution for Internet and corporate network requirements.

For smaller offices or large headquarters: Business Connectivity is a modular and scalable solution for Internet and corporate network services. On our online portal, you can very easily configure your business service according to your needs. In doing so, the fastest access technology available for your location is selected automatically - guaranteeing you the best possible performance at all times.

You can easily and dynamically expand the scope of services of Business Connectivity with the selected options. Regardless of whether you need guaranteed bandwidth or prioritization of your data traffic with quality of service, take care of all this at a mouse click through the online portal.

Key features

Unlimited business access

Business Connectivity is a modular solution for the Internet and connecting multiple locations. Whatever service you may need at any given time, you can comfortably configure your desired features through the online portal, and make changes whenever necessary. The scope of services grows with you and your needs – seamlessly. The perfect connexion technology with the best performance is selected automatically for you – whether it is installed via copper, fiber optics or mobile via 4G/5G. Optionally, for maximum availability your access can also be created with a guaranteed bandwidth or redundant system. With a mobile service over the Sunrise mobile network, your data are transmitted with the highest priority.

Unlimited Internet service

The configurable Internet service guarantees you the shortest response times and a perfect connection to the first-class Sunrise Internet backbone. If required, you can expand the scope of services by optional fixed IP addresses for IPv4 or IPv6. Intelligent online features for flexible ordering, easy monitoring, and dynamic adaptation are available, hassle-free and at a mouse click.

Unlimited VPN service

With our VPN service (virtual private network), you can efficiently establish connections with and between your different company locations. You can reserve bandwidths for various networks and prioritizations with quality of service (QoS) can efficiently be configured through the online portal.

Service level and professional services

Sunrise offers reliable monitoring of the Sunrise backbone and your data network, around the clock and 365 days a year. If you have any questions or complex technical concerns, our customer service representatives are always available via the Network Operations Center. Your contacts can be reached either on the phone or through the Sunrise Business Portal (SBP). Trust an experienced and multi-award-winning ICT provider and simply concentrate on your core business.

Your advantages at a glance

- One solution for Internet and for connecting multiple locations. Modular. Scalable.
- Top performance and highest availability with the best possible connexion technology. Simple. Proven.
- Digitalized service. Simple. Dynamic.
- Managed service with 24/7 help desk. Competent. Reliable.
