

Business Internet Light. Fast, simple and reliable.

Business Internet Light is the optimal solution for your company. Choose your required bandwidth with the respective download and upload speed, availability and support services - and benefit from unlimited data volume as well as a favorable price. Thanks to our modular system, you can make Business Internet Light as flexible as you need it to be for your company, while relying on tried-and-tested services.

Asymmetrical and symmetrical bandwidths of up to 1 Gbit/s are available for Business Internet light.

Business Internet Light covers the needs of small to medium-sized companies and organizations.

Free choice of routers

You can either use the router of your choice or order the required hardware from us.

A fixed IP address is included

By default, Business Internet light supports 1 fixed IPv4 address. You have the option of adding further fixed addresses.

Flexibility in choosing the SLA

Every business relies on the availability of its data and services. Choose between standard support and guaranteed repair time according to your needs.
