

Business internet direct.

The reliable way to the World Wide Web.

Mid-sized and larger national as well as multinational companies want a powerful, reliable connection to the Internet with generous bandwidth that can be conveniently expanded as desired. Multi-homing and backup make it possible to provide an Internet connection with optimal reliability and availability. And if your needs change, Business internet direct can be expanded quickly and easily.

Customer network

Key features

- Managed service from service access point (LAN interface of the router)
- Supports customized offers (with security and voice options)
- Convincing Internet topology with numerous international peerings
- Multi-homing and backup for maximum availability and connectivity
- Bandwidths of 2 Mbit/s to 10 Gbit/s

The combination that pays.

Easy, efficient, and affordable: This is how business communication should ideally work.

With Sunrise you will receive everything from A to Z. So not only will you get a landline, mobile phone services, and Internet all in the same place, but you will also have the opportunity to combine the offers with one another: one example is the combination offer of Business internet direct and Business voice direct that brings together landline phone services and Internet in an ideal combination on our own copper or fiber optic network. Another example is the smart combination of Internet connection and a cloud-based phone service solution.

Your benefits at a glance

- Fully managed and reliable service
- Tailored to your individual needs
- Highest level of availability and connectivity
- Expandable with further security and voice options
