# Business SD-WAN.
Connect secure and agile corporate network locations at home and abroad. Powered by ngena.

Nowadays, business customers expect to have more control, transparency and flexibility of their private networks both at home and abroad. Would you like to manage and monitor your configuration and data traffic quickly and transparently, and be able to install new functionalities? The Business SD-WAN service, provided by Sunrise in cooperation with our partner ngena, is here for just that purpose.

Business SD-WAN from Sunrise is a software defined networking (SDN) solution that allows national and international company locations to be connected quickly, flexibly and securely. You can easily choose between different access designs, bandwidths, SLAs and options. An extensive set of various functions additionally allows local Internet access, encryption, security, or Cloud Connect, depending on your needs.

Good to know: Sunrise provides its Swiss customers with connections at home and abroad from a single source – thanks to our partnership with ngena, which enables access around the world.

02.2019
