## Make your work easy... Collaboration from everywhere

Create a presentation. Share ideas. Have discussions  
Plan the next steps. Invite colleagues in. Call a  
customer. Schedule a follow-up. Make decisions.  
Forward meeting minutes. Collaboration in the cloud.

## Improved teamwork with Circuit

### Location-independent collaboration

Circuit offers user-friendly and powerful collaboration functions, either as a stand-alone solution or in combination with your existing communication and business applications.

**Accept calls** Circuit can be used based on any SIP telephony infrastructure, whereby users can accept and make calls via the integrated Telephony Connector and also manage their voicemails.

### One tool – one view

In Circuit, everything comes together in one single app: A central, virtual meeting point with all the functions you need for communicating with your teams.

**Device-independent** The same user experience on every device: You have online access to your conversations, communities and documents, no matter where you are.

### Set up a conference room

Any room is transformed into an HD video conference room in an instant with the powerful, user-friendly Circuit Meeting Room solution.

### Optimized workflows

Integrate your workflows and business applications via the Circuit SDKs and APIs.

### An organic user experience

Whether voice, video, screen sharing, or chat, Circuit is so easy to use that you can work together remotely as if you were in the same room.

### Powerful and context-related searches

With Circuit, it's easy to find any content. With the search and filter functions for search terms, labels, files, or persons, you can find what you need in a matter of seconds. **Stay in control** Put an end to the disclosure of confidential data via Shadow IT or fee-based audio and video conferences.

**Social collaboration** Create online communities, and promote collaboration, interaction, and the exchange of opinions and ideas within the entire company.

Circuit is your digital workspace in the cloud.

# Designed for the way teams work today

**do you have a great idea and want to share it in real time?**

Outline your idea, share your screen, discuss solutions, make decisions, share everything in a conversation, and save it – in Circuit.

**Do you need files from various storage locations?**

Circuit extensions give you direct access to Box, Google Drive, One Drive, and Syncplicity, and you can integrate your productivity and business applications with the Circuit SDK.

**Do you need a team to solve a problem?**

See who is online and invite them to a spontaneous conference. Do you need external experts? They, too, can participate. No plugins required.

**Do you want to communicate on a social network without any security risks?**

Share and download files, chat, and add others to your conversation? Circuit is an intra-corporate app for social collaboration in business.

**Are you participating in a conference and need to catch a train?**

One swipe is all it takes to transfer the Circuit call to your mobile device. Transfer it back to your laptop when you are back at your desk or have reached your destination.

**Have you missed a meeting and would like to know the current status?**

Listen to the recording (audio, video, screen sharing) of the meeting, download the documents, and view the comments the participants made. With Circuit, you won't miss a thing.

Regardless if you are on your laptop, your mobile device, or your smartwatch

**Circuit is your digital workspace in the cloud** For the first time, all functions are centrally available: Voice calls, video conferences, messaging, screen and file sharing. There is no need to switch back and forth between apps or remember several passwords. Everything can be shared, downloaded, and reviewed. The implementation is fast, and the integration is convenient and easy. With cost-effective per-user packages, Circuit gives you the operative and financial flexibility your company needs.

## Integrable into your future

The integration of your web-based processes with Circuit offers you a host of new possibilities for collaboration and communication. By adding extensions, you can make Circuit an integration platform for hundreds of business applications. You can even go one step further: Integrate Circuit into the IoT systems for your suppliers, logistics, and warehouse management.

Circuit is a Unify product.
