Mobile ID.
The one-size-fits-all authentication solution as a managed service.

Mobile ID is a secure service providing two-element authentication for your applications, portals, and business applications. The authentication process is carried out using the SIM card in the user's mobile phone. A standard interface makes it possible for applications and online portals of all kinds to be easily connected to the Mobile ID service. This enables companies, service providers, or public authorities to take advantage of a strong two-element authentication solution for their applications and portals with the utmost ease. Access to a hardware's applications will always be protected even if the hardware is lost, since unauthorized users don't know the Mobile ID PIN.

Secure login for all of Switzerland: Sunrise, Swisscom and Salt together offer the "Mobile ID" service for secure and simple authentication via a mobile phone.

Key features

- Secure authentication service for all company applications and online portals through the mobile phone.
- There are two elements that provide security: "Ownership" (mobile phone and SIM card) and "Knowledge" (Mobile ID PIN).
- Mobile ID runs directly on the SIM card as an application; you don't need to install any software on the mobile phone.
- As a managed service, Mobile ID doesn't place any strain on backend infrastructure or operation.
- Quickly scalable solution for use with as many applications and portals as desired.

Minimal expenditure, maximum performance.
More for less: The integrated authentication solution at an attractive rate.

The new authentication solution, Mobile ID, is a managed service that can be obtained at an attractive monthly rate. You will only be charged for telephone numbers in use – so you only pay for the users that are effectively utilizing Mobile ID. Mobile ID runs directly on the SIM card as an application; you don't need to install any software on the mobile phone. To be able to use this service with Sunrise, all you have to do is replace the SIM card with a latest-generation smart SIM card.

Your benefits at a glance

- All you need is your mobile phone with integrated Mobile ID for authentication.
- All expenses for handling, processing, logistics, and investments in the hardware or software necessary for strong authentication are included in the managed service.
- You only pay an attractive monthly fixed price per active user for Mobile ID.
- Business Sunrise will provide you with support in integrating Mobile ID into your IT systems (additional charges may apply depending on expenditures).
