

Business SMS Link.

Send information in a fast and targeted manner.

Would you like to forward important messages of news to your employees? Have your customers subscribed to receive certain information services? Do you want to send alarm or telemetry data quickly, discretely and safely? With Business SMS Link, a handy service program from Sunrise, large volumes of SMS messages can be sent easily.

Simply connect your application via the Internet to our Short Message Service Center (SMS-C), and you will be able to reach every device that is connected to a GSM mobile network in Switzerland securely and reliably.

If the recipient is already a Sunrise customer, a reply message can also be sent back to the service program. You can therefore have the receipt of alarm, positioning or telemetry data (incl. the date and time of receipt) confirmed by SMS.

Key features

- Connection to the SMS-C messaging platform
- Send and receive messages with up to 1000 characters
- Text lines for the invoices of mobile devices can be chosen freely
- Confirmation of receipt can be sent back to the service program
- SMS can be sent to all GSM mobile networks in Switzerland
- Replies from Sunrise customers can be sent directly to the service program

Your benefits at a glance

- Low-cost mass distribution via a connection to the Sunrise SMS-C
- SMS can be sent to all GSM mobile networks in Switzerland
