

Business IP VPN.

Connecting corporate branches - efficiently and securely.

If you're looking to connect your corporate branches securely and quickly with individual service features, then Business IP VPN is the ideal, cost-efficient solution for you. You decide the level of performance and the services and we make them available where you need them.

There are various connection topologies available for this, which differ in terms of the technologies used, bandwidths, guaranteed service availability and additional options. If your requirements change, the service can be quickly and flexibly adapted to your new business needs.

With Business IP VPN your data is kept separate from the public Internet on the MPLS Backbone (Multiprotocol Label Switching) from Sunrise. This guarantees your privacy and enables a high level of quality in data transmission. Our specialists monitor your entire network around the clock.

Key features

- Individual offer: You define the range of services and options
- Scalability: Business IP VPN grows with your company
- Security and availability: Sunrise constantly monitors your data network
- Service level agreement: The SLA defines our obligations
- No investment costs: All network components are included in the price
- Technical contact: Support from a team of IP specialists
- Experience: We've already networked thousands of offices

Your benefits at a glance

- Fully managed end-to-end service for your network
- Customer-specific solutions at transparent, customized prices
- Online tools for analyzing network utilization, performance and billing
