

The easy way to get online.

EN

Only install after receiving
activation confirmation! **!**

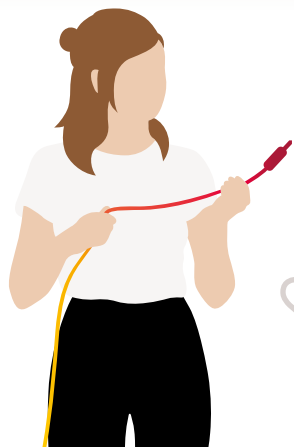

- 1. Plug in the power cable**
- 2. Plug in the fiber optics cable**
- 3. Get surfing!**

Sunrise

1

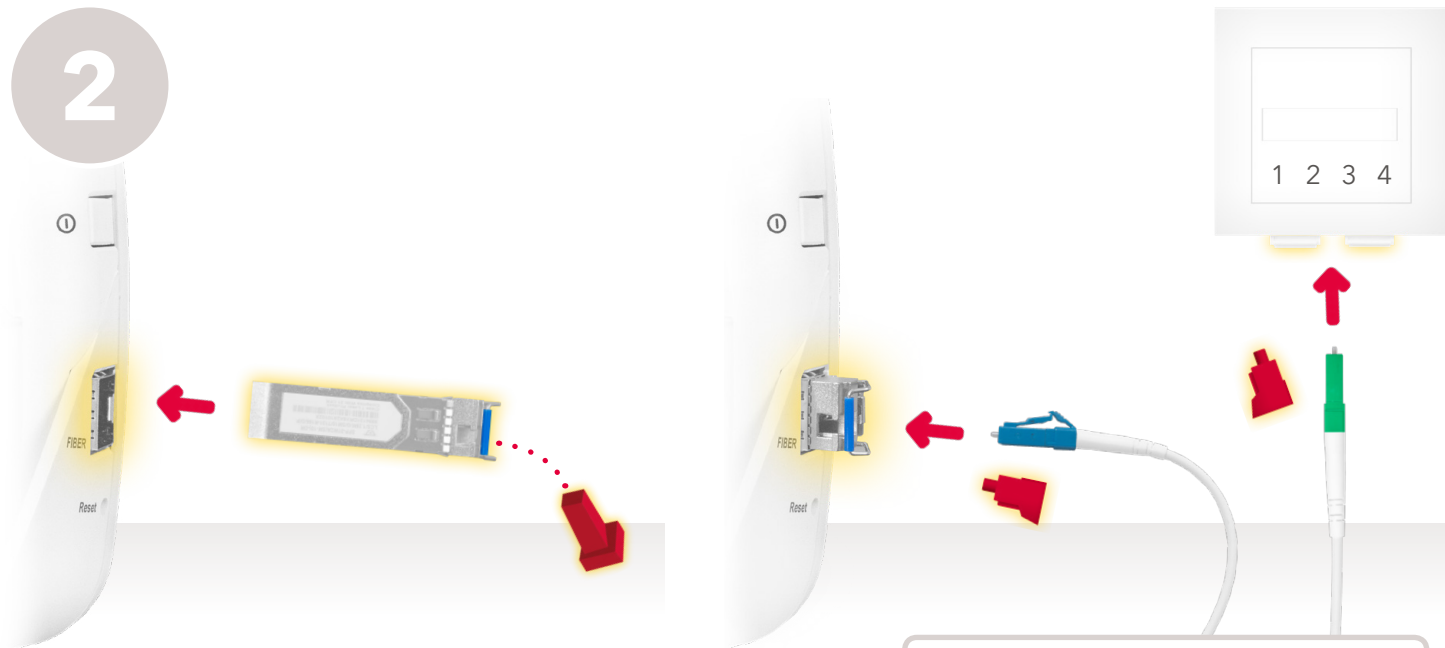

ON/OFF

First plug in the power supply
and switch on the box.

2

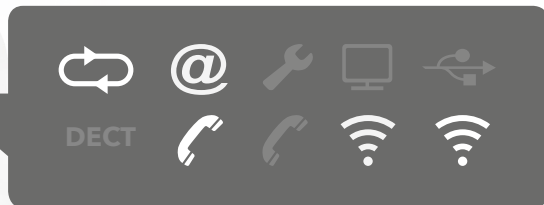

Remove the **protective cap** from the fibre module. Now plug the fiber module into the box.

Remove the **protective caps** from both ends of the fiber optic cable and open the cap on the fiber optic cable outlet (OTO socket). Plug the blue end of the cable into the fiber module and the green end into the port on the OTO socket indicated by Sunrise (1-4).

3

Plugged everything in? If the symbols light up as shown here, you're now online. This can take up to **10 minutes**.

Now connect your devices to both networks (2.4 and 5 GHz). You can find the related information on the bottom of the box.

For more help, visit www.sunrise.ch/sib-4
There is an even easier way: Scan the QR code with your mobile camera/QR scanner app to get to the instructions.

If something doesn't work quite right: You can find **help** and **Tips & Tricks** on the back.

What should I do?

I can't plug in the fiber **optic cable**.

Have you removed the protective caps from both ends of the cable? Have you removed the protective caps of the fiber module and opened the cap of the OTO socket outlet?

I've plugged everything in as instructed and still don't have **any internet**.

Have you received the activation confirmation? Have you plugged the fiber optic cable into the correct port on your OTO outlet?

I can't find my Wi-Fi (WLAN) **login data**.

You can find the network name (SSID) for 2.4 and 5 GHz and the password on the bottom of the box or on the enclosed sticker. This sticker has a QR code on it to scan and being quickly connected.

The **LEDs** are not lit up.

Have you correctly plugged in the power cable? Is there any power coming from the outlet? Have you pressed the ON/OFF button?

For more instructions, visit **www.sunrise.ch/sib-4** There is an even easier way: Scan the QR code with your mobile camera/QR scanner app to get to the instructions.

Tips&Tricks

You can dim the LEDs. Briefly press both buttons simultaneously on top of the box.

Meaning of LEDs:

	DSL/fiber connected	DECT	DECT phone connected
	Internet connected		Phone number ok
	Configuring - do not touch		Second phone number ok
	TV service configured		Wi-Fi (WLAN) 2.4 GHz
	USB device connected		Wi-Fi (WLAN) 5 GHz

Stand your box upright and install it as centrally as possible. To ensure that you get the best overall reception, do not place the box in a cabinet or too close to an aquarium.

To customise your box, simply open the configuration page in your browser.
