# It doesn't have to be expensive.

## Tips and tricks for smart roaming.

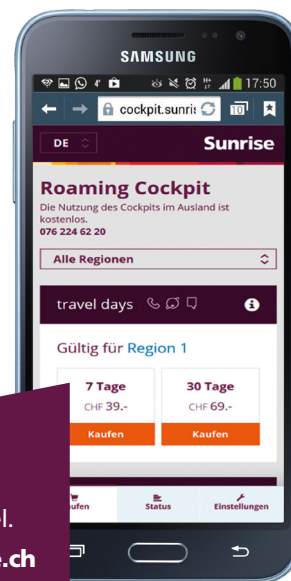

### Signing up for options made easy: with Sunrise Roaming Cockpit.

Sign up for Business Sunrise travel options before or during your trip – very conveniently on your smartphone's browser. Here's how it works:

1. Go to **cockpit.sunrise.ch** on your smartphone (over WLAN or data roaming).
2. Select your desired option.
3. Activate the option and enjoy your vacation.

### Your advantages with Sunrise Roaming Cockpit:

- Free access worldwide.
- The Roaming cockpit recognizes in which country you are and suggests you the relevant roaming options.
- Overview of your current roaming costs and the data volume you've used.
- Full cost control: block data roaming as soon as you've used up your data volume.
- Conveniently sign up for your Business Sunrise travel options before you leave Switzerland: your smartphone will also be ready for vacation.

Cost control.  
Worry-free travel.

### Our roaming suggestions.

With a couple of simple tweaks you can get even more out of your roaming package. The following tips will help you easily control the data amount.

#### • Deactivate or restrict your services:

Regulate the most data intensive applications or shut them down completely. These could include location services and background updates for certain apps. You can also switch off automatic synchronization of all your apps in your smartphone's settings.

#### • Download ahead of time:

Many services have an offline mode. While still in Switzerland, download and save the contents of, for instance, your Spotify playlist or a map of your destination through Navigon to your mobile.

#### • Use apps:

Apps installed on the hardware often use far less data than constant searches over the internet browser. It's therefore a good idea to use specific apps for any information you may need, such as an app for local traffic or restaurant information.
