	Mobile Internet in Switzerland
Data volume	Unlimited
Maximum speed	2 Mbit/s (download) and 2 Mbit/s (upload)
Note	<p>The transfer speeds represent the best possible performance and cannot be guaranteed. Actual Internet speed depends on factors such as topography, network coverage, distance to the transmission tower, signal strength inside/outside buildings or other factors and may be slower than the specified maximum Internet speed.</p> <p>Excessive use of mobile network services can impair network performance, which has a direct effect on other mobile network participant's user experience. In order to prevent this situation, Sunrise will temporarily deprioritize data traffic of customers who reach a certain limit value. This generally only becomes noticeable when carrying out more data-intensive activities and only on antenna cells that are temporarily overloaded. Please visit our <a href="#">website</a> for more information.</p>
